ABSTRACT

.This bibliography, the fifth in the Urban Schools Bibliography series, provides urban school personnel, researchers, and policymakers with information on important/issues, programs, and practides in urban education. Topics covered in the bibliography. include equal education, school policy, school administration, curriculum, testing and evaluation, academic achievement, career development, nontraditional education, and community involvement in education. As with the preceding volumes in the series, this collection of references was compiled by searching "Resources in Education, " ERIC's monthly abstract journal, for documents that were either (1) developed and produced by large urban school districts, or (2) developed by outside authors, agencies, or institutions and of general relevance to urban educators. The bibliography is divided into two major parts: (1) a section containing main entries which presents citations (including title, author, source, publication date, information about document availability, subject index terms, and an abstract) in the order in which they appeared in "RIE"; and (2) a section containing subject, author, and institutional indexes. All of the works cited in the bibliography are available through the ERIC system. Information on document ordering and availability is given on the last page. (CMG)

The Urban Schools Bibliography 1982

Clearinghouse on Urban Education, provides urban school personnel, researchers, and policymakers with information on important issues, programs, and practices in urban education. As with the preceding volumes in the Urban Schools Bibliography Series, this collection of references was compiled by searching Resources in Education (RIE), ERIC's monthly abstract journal, for documents that were either (1) developed and produced by large urban school districts, or (2) developed by outside authors, agencies, or institutions and of general relevance to urban educators. The first four Bibliographies contain, altogether, over eight-hundred document references that originally appeared in RIE from 1975 to 1981. Most of the cited works document the research of particular urban schools and school systems. These Bibliographies are available from the Clearinghouse under these titles:

Volume I: Equal Opportunity in Education

Volume II: School Policy, Administration, and Curriculum

Volume III: Testing, Evaluation, and Academic Achievement

Volume IV: Career Development, Alternative Schools, and Community Involvement in Education.

This latest volume updates these works and contains 140 citations that appeared in RIE from January through December of 1982. The Bibliography is divided into two major parts: a section containing main entries and a section comprised of three indexes.

The main entry section preser citations including title, author, source, publication date, information bout document availability, subject index terms, and an abstract the order in which they appeared in RIE.

As you can see in the sample to lowing page, each citation is headed by two numbers. On the right is the ED or ERIC document number. On the left is the Clearinghouse citation number; these numbers range from UE 0001 to UE 0140 and correspond to the sequence in which the citations are listed in this Bibliography. It is this number which appears after the title of each document cited in the subject, author, and institutional indexes.

All of the works cited in this <u>Bibliography</u> are available through the ERIC system. They may be read at any facility that houses an ERIC microfiche collection or may be purchased from the ERIC Document Reproduction Service (EDRS). For ordering documents from EDRS, the reader should refer to the ED number located in the upper right hand corner of each citation. Information on document ordering and availability may be found on the last page of this. Bibliography.

This Series will be updated annually. For information on updates as well as on other publications and services, please write to the ERIC Clearinghouse on Urban Education, Box 40, Teachers College, Columbia University, New York, NY 10027.

Descriptors - Career Guidance, Career Planning, Careers, *Demand Occupations, *Employed : Women, *Employment Opportunities, Females, Labor Force, Labor Market, *Labor Needs, Occupational Aspiration, Occupations

Identifier — Consortium of States, *National Occupational Competency Testing Institute Women's opportunities for employment will be

directly related to their level of skill and experience and also to the labor market/demands through the remainder of the decade. The number of workers needed for all major occupational categories is expected to increase by about one-fifth between 1980 and 1990, but the growth rate will vary by occupational group. Professional and technical workers are expected to have the highest predicted rate/(39. percent), followed by service workers (35 percent), clerical workers (26 percent), sales workers (24 percent), craft workers and supervisors (20 percent), managers and administrators (15 percent), and operatives (11 percent). This publication contains a brief discussion and employment information concerning occupations for professional and technical workers. managers and administrators, skilled trades, sales workers, clerical workers, and service workers. In order for women to take advantage of increased labor market demands, employer attitudes toward working women need to change and women must: (1) receive better career planning and counseling, (2) change their career aspirations, and (3) fully utilize the sources of legal protection and assistance which are available to them. Descriptors—Annotated Bibliographies. "Asian Americans, Attitude Change, Books, "Childhood Attitudes. "Childrens, Litterature. Elementary Education, Ethnic Bias, "Ethnic Stereotypes, Language Arts, "Multicultural Education, Reading Aloud to Others, Reading Instruction, Reading Materials, "Reading Material Selection". Intended for reading and language arts teachers of multiethnic classes, this report discusses the use of children's literature featuring Asian American chiracters and how these books can have a negative or positive influence on attitudes toward and of ethnic groups. The first part discusses the importance of presenting Asian American children's literature appropriately and how misuse can have a damaging effect on children of Asian descent. This section also reviews studies that show how exposure to ethnic literature can influence attitudes positively or also reviews studies that show how exposure to ethici iterature can influence attitudes positively or negatively and presents guidelines for evaluating Asian American children's books. The second section is an annotated list of 12 recommended Asian American children's books. The third section presents ideas and strategies for teaching Asian American folktales, playing with language sounds, comparing cross-cultural experiences, examining history, and experiencing Asian American history through role playing. Identifiers—"Himong People, Language Contact
This study examines some aspects of the interaction of one Himong family with the English-speaking community to determine what sort of language contact situations they encounter and what means they use to communicate in those situations. Observations revealed that English language use outside of the classroom was limited. The subjects did not seel out and, sometimes actively avoided, situations requiring the use of English. Where the use of English could not be avoided, communial communication strategies involving spokespersons or interpreters (occasionally a younger member of the family) were employed. Only when spokespersons were unavailable did adults attempt of communicate directly. This action questions the common assumption in second language teaching that what is taught in the classroom will be reinforced through outside language contacts. This Himong practice may reflect not only a lack of appropriate language learning skills but also a tradition of community isolation and self-sufficiency carried over from the Himong experience as a geographically isolated minority in Laos and China. Communial strategies of survival communication might never learn to communicate in English well enough to survive alone. (Author/JK) English well enough to survive alone. (Author/JK)

City Public Schoola.

This is an evaluation of a Title VII bilingual education, project, the Native Language Reading Approach, conducted in the New York City Schools in
1979-80. The program was designed to serve as an
exemplary reading and native language arts project
in elementary schools for a largely Hispanic student
population, but also served speakers of Italian,
Greek, Croole/French, and Chinese. Contained in
the report is information regarding; (1) program and
school sites; (2) "ito selection; (3) student eligibility
criteria; (4) characteristics of the target population;
(5) program staffing—(6) program implementation;
(7) instructional approach; (8) materials development and dissemination; (9) staff development; and
(10) parental involvement. The evaluation coneludes with a discussion of the benefits and drawbacks of the project, and some recommendations to, backs of the project, and some recommendations to improve implementation. (APM)

This master plan, devised by/San Diego County)
has as its objective the total integration of all refugees into the mainstream of community life. The plan begins with background material that describes its goals and the refugee population to be served. In the second section, the county's current program is outlined and the administrative responsibilities of the Federal and local government are discussed. The third section provides an analysis of the needs of refugees in the areas of education, accultygation, housing, medical assistance, employment, and social services. Section four presents an overview of the county's proposed plan for 1981-1982 and covers funding, services, and organization and staffing. Proposed actions such as staff training, improvement of refugee access to services, and involvement of the private sector necessary for facilitating the county's plan are reviewed in section five. Administrative coordination of the plan's implementation is discussed in the sixth section. The last section contains a restatement of program objectives and funding prospects. Exhibits attached to the report include: (1) quarterly statistical report on Indochines refugees; (2) membership list of the Interjurisdictional Committee on Refugees; (3) refugee cash assistance data; (4) membership list of the final Diego Refugee Coalition; (5) California State's suggested outline for the county plan (APM)

Observations were made while wychologically, evaluating Korean school children in the greater Chicago area. The observations were drawn from work with Korean children who were referred for psychological evaluation because of learning or behavioral/emotional problems. Initial demographic data was taken describing the children's agelength of time in the U.S., sex, language spoken at home, and reason for referral. Results for intelligence, perceptual-motor, projective, and achievement tests were obtained. On the intelligence test both the Mean Full Scale and Verbal IQ scores were slightly below equal to the American norms. Perboth the Mean Full Scale and Verbal IQ scores were slightly below equal to the American norms. Performance on the perceptual-motor test was also similar to American norms. Tentative conclusions were drawn from the projective test for personality and emotional assessment, which was given to a small, number of children who revealed a limited verbal capacity and limited creative resources. On the schievement test children were on the whole three or four years behind in reading, and spelling, and two years behind in arithmetic. Recommendations were made on the basis of these test results and solutions to Korean children's language and acculturation problems were offered. (Author/APM)

This ethnographic study of 16 Chicago school
principals explores the principal's effect on students
and teachers within the school; on parents and laymen in the community; on their superior in the
administrative hierarchy; and, on themselves as carecer-oriented professionals. A brief literature review
relaten studies examining the principalship of elements of-the current study. Both elementary and
secondary principals were found to spend most of
their time in principal-initiated contacts with staff,
faculty, and students. These principals affected their
schools by balancing stabilization and enhancement, transforming attitudes that opposed school
policy, and controlling the climate to foster uninterrupied learning. In the community, the principals
had to diplomatically shape parent expectations of
the schools' capabilities. Principals' responses to

their superiors ranged from ignoring orders to overt disobedience in order to protect staff morale. The principals often short-circuited the system and used principals often short-circuited the system and used superiors indecision to their schools' advantage. They shaped their jobs to suit their personal preferences and work styles. They relied more on one-to-one, face-to-face communications in contrast to businessmen who depend more on group meetings and written memorands. This study also describes ways-principals obtained and utilized professional information. (MMJ)

Descriptors—*Adjustment (to Environment), Adolescents, *Cultural Differences, Emotional Disturbances, Migrant Problems, Migrant Youth, *Puerro Ricans, *Social Adjustment Identifiers—Connecticut (Hartford), *More Alterntives for Students*

The paper reviews cultural experiences that create home-school discrepancies in Puerro Rican adolescents, some of whom have remigrated from the mainland to the island, and considers factors leading to a diagnosis of social maladjustment or emotional disturbance. The effects of cultural experience, the parents' expectations, and the family seconomic situation are examined. Cultural discrepancies experienced by Puerto Rican pupils participating in "More Alternatives for Students," an alternative program in Hartford, Connecticut, included discrepancies in time, space, dependency, personalism, humanism, and relationalism between both cultures. The author concludes that special education teachers must realize that their educational methods are derived from their own culture and must gain a more thorough understanding of the island's educational methods and culture. Descriptors—"Change Strategies, Educational Improvement, Higher Education, Inservice Teacher Education, Preservice Teacher Education, Program Development, Relevance (Education), Success, Teacher Effectiveness, Teacher Improvement, Teaching, Experience Teaching Methods, Urban Schools Effective training for teachers in urban schools should begin from and be based upon an analysis of teacher work success. The major steps in the developerant of a success-based teacher training program (both preservice and inservice) are: (1) locate the educational settings where successful teacher practices are evident; (2) study the teachers instrumental in groviding the desired outcomes; (3) analyze and synthesize the data; (4) develop training processes for the skills and knowledge needed; and (5) conduct followup evaluations. Two fundamental assumptions of this "backward planning model" are that the criteria for judging teacher work success can be agreed upon and that applications of the success criteria can yield positive results. Other suggestions for improving preservice teacher education are that teacher education curricula should build on students prior knowledge and should be tailored to round out teacher candidates, preparation. Increased attention should be given to group instruction for the prospective teachers sense of efficacy. Inservice teacher education programs should be treated quite separately from preservice, since the challenges and contextual realities are different. Effective inservice training is organized around as many teachers as possible within an individual school and demands considerable commitments of time and dedication. (FG)

This study examines the delivery of social services in urban education in the light of the history of their origination, implementation, and significance. Explored are the educational reform movements in urban centers between 1840 and 1920, especially the period separating the depression of 1893 and the Palmer Raids of World War I. Attention focuses on four cities: Rochester, New York; Toledo, Ohio; Milwaukee, Wisconsin; and Kansas City, Missouri. A case study analysis of these-four cities evaluates the influence of both well known and obscure educational reformers by using a diverse range of sources which include newspaper reports, records of voluntary associations, and petitions to local school boards. The analysis identifies different political traditions, ethnic mixes, bureaueratic school arrangements, and industrial settings which confributed to the shape of new social service programs in different communities. The study attempts to discover the ments, and industrial settings which contributed to the shape of new social service programs in different communities. The study attempts to discover the cause of the upsurge in interest in school reform at the turn of century, groups and community organi-cations that lobbied for change are identified. Also reviewed are attitudes of parents and children to-ward educational reform and how these changes at-fected their lives. (Author/APM) fected their lives. (Author/APM)

Presented here are four case studies of urban collaborative educational mograms: (1) the Dallas independent School District - Magnet Arts High School; (2) the UZs Angeles Unified School District Regional Occupational Centers Program/Skilled Training Education Program; (3) the Detroit Public Schools 2 Community High School; and (4) Philadephia's Parkway Program. Collaborative programs are defined as involving one or more of the following non-school agencies: business, industry, labor, institutions of higher, education, community groups, local government, and service agencies. Each case study attempts to examine the costs associated with profects, determine the impact of collaborative programs on students in both academic and occupational domains, and describe the educational processes and characteristics necessary, for success. Case studies also identify those school and business practices which best facilitate student transition from school to the labor market. The organizational structure and operational technique of each program are discussed and effective curricular models and positive student and community outcomes are highlighted. The goal of the Inservice Training Componess of
the Detroit (Michigan) school desegregation plan
was to improve the effectiveness of school staff in
ineeting educational needs. The program consisted
of inservice education workshops focused on four
areas: human relations; teaches expectations; ethnic
and racial awareness; and crisis prevention and intervention. The Inservice Training Component was
evaluated using the results of four annual surveys of
school studins at all levels and of middle and high
school students conducted in 1977, 1978, 1979, and
1980. Findings indicated that progress was made
toward most of the six objectives of the component
which included: (1) student racial relations; (2) rela-

toward most of the six objectives of the component which included: (1) student racial relations; (2) relations between instructional staff and students; (3) racial relations among staff, members; (4) teacher treatment of black and white students; (5) knowledge of racial-ethnic groups; and (6) ability to prevent disruptive classroom behavior and resolve conflicts. The goal of the Counseling and Career Guidance
Component of the Detroit (Michigan) school desegregation plan was to improve student effectiveness
in the areas of personal, social, academic) and career
development. Major program functions included individual and group counseling, program selection
and placement guidance, career guidance, and referral and information tervices. The Counseling and
Caseer Guidance Component was evaluated using
the responses of students, staff, and parents to survey questions. About 50 percent of the students
reported receiving counseling and guidance services. Of these students, 80 percent reported that
the services were helpful. Staff survey results, indicated that 90 percent of elementary, middle, and
high school teachers conferred with a counselor
concerning a student at least once during the year.
Two thirds of the teachers felt that the conferences
were effective. Parent survey results showed that 64
percent of elementary parents and, 85 percent of
middle and high school parents talked with a school
counselor during the year. (Author/MK)

The goal of the Elementary and Middle School Reading and Communication Skills Component of the Detroit School desegregation planewas to improve students' reading achievement. The major factor of the program was a reading instruction management system called the Detroit Objective-Referenced Tests System (DORT). DORT is a diagnostic-prescriptive approach based on specific skill. Referenced Tests System (DORT). DORT is a disagnostic-prescriptive approach based on specific skill objectives for each of Gredes K through 8. Additionally, the program called for parent involvement in the improvement of middle school students' reading abilities. Results of a product evaluation of the program provided evidence of progress toward the goal of improved reading achievement. Evaluative findings showed that: (1) average levels of reading achievement improved generally in elementary and middle schools; (2) there were continuous gains in attainments of satisfic reading akills objectives in grades 4 and 7; (3) teachers were adapting reading instruction to individual student needs; and (4) parents were helped in assisting in the improvement of ents were helped in assisting in the improvement of their children's reading abilities. The goal of the High School Reading and Communication Skills Component of the Detroit school desegregation plan was to improve students' reading and communication skills. The program was an integral part of the English curriculum and employed instruction focused upon specific objectives at each grade level. Support services were provided in each high school by at least one reading specialist and one educational technician. Results of a product evaluation of the program showed progress toward the attainment of program objectives. Findings indicated that: (1) students in grade 9 improved their mastery of nine specific skills; (2) grade 10 students demonstrated increasing levels of mastery of reading objectives; (3) the decline in standardized achievement test results for/eleventh graders that was evident between 1972 and 1978 halted; and, (4) in January, 1980, 81 percent passed the writing skills area of the High School Proficiency Examination. The Uniform Code of Student Conduct Component of Detroit's (Michigan) school desegregation plan was ordered in 1975 by the court to promote a peaceful and orderly environment in the schools so that students could receive educational experiences in an atmosphere which would be substantially free from disruptions and violence. Uniform Colicies concerning discipling and attendance were

designed and implemented. Results of a product evaluation were mixed. Evidence supported the conclusion that the environment for learning had improved since the Detroit schools were designed gated. There was progress in educing the incidence of disruptive, and violent students behaviors in middle and high schools and there were improvements in student social relations. Evidence concerning stations. in student racial relations. Evidence concerning at-tendance showed that student attendance in middle and high schools declined between 1976 and 1980. and high schools declined between 1970 and 1980. There were slight improvements in elementary school attendance during the same four year period. (Author/MK)

To help New York City public schools reduce the fragmentation of student services and design comprehensive instructional plans, researchers gathered examples of cohesive programs that unify classroom instruction with special compensatory educational services funded by outside sources. Chapter one reservices funded by outside sources. Chapter one re-views the problems caused by fragmented instruc-tional Asservices, discusses the concept of comprehensive planning, and describes 11 compre-hensive programs solicited from school boards and educational researchers around the nation. In chapeducational researchers around the nation. In chapter, two the authors present the results of 40 case studies of New York City schools that provide compensatory, instruction through three or more programs funded outside the regular district budget. The findings indicate a high degree of instructional fragmentation. Chapter three profiles two districts and three schools that have model comprehensive instructional plans. The chapter also examines factors affecting comprehensive planning and the sale. instructional plans. The enapter also examines fac-tors affecting comprehensive planning and the rela-tionship between planning and student achievement. Planning services available from the New York City Board of Education's Comprehen-sive Planning Unit are outlined in chapter four. Ap-pended to the report in a second volume are copies pended to the report in a second volume are copies of the case study research instrument, data tables, and planning documents from a model district and school. Identifiers—California (Long Beach)
This handbook contains information to assist teachers serving in Bilingual/English as a second language (BESL) assignments. Its purpose is to provide focus to the BESL program and to help LEP (Limited English Proficient) students improve their ability to read, write, and speak English, while developing needed concepts and skills. It was prepared by a committee of teachers; paraprofessionals, and administrators working with students during the 1977-81 school years and is intended for use in the Long Beach Untitled School District's Spanish/English bilingual classes, grades K-8. The BESL handbook includes ten sections devoted to the following topics: (1) philosophy and goals of programs using bilingual education procedures, techniques, and methods; (2) organizational design, including remarks on the self-contained bilingual ehassroom and on team teaching; (3) guidelines and information about materials and district resources; (4) cognitive learning styles; (5) approaches to bilingual leason delivery; (6) oral language skills, Spanish and English; (7) Spanish Reading Skills; (8) English Reading Skills (Transfer); (9) cultural activities; and (10) parent involvement. An appendix lists often-used acronyms. (MES)

The representativeness of children referred for Committees on the Handicapped (COH) evaluation; social-demographic and administrative variables related to referral rates at the school level; and representativeness of the popuchildren referred for Committees on the Handicapped (COH) evaluation; social-demographic and administrative variables related to referral rates at the school level; and representativeness of the population of pupils placed in publicly funded private programs for the handicapped were examined. Hispanies and blacks were found to be discriminated against in public funding for private school placement. Examination of the policies that determine a student's qualifications for public funding would be the most cost effective remedy to reduce representational discrepancies in the REP process. Referral to COH was found to be predominantly disciplinary among blacks, while for whites it was learning problems. The existence of remedial and supplementary programs at the local school level would reduce non-essential labeling and segregation of children. The addition of bilingual staff would reduce representational disparities in public school special education. Ethnic disparity in granting of contract aid accounted for the discrepancies in ethnic representation of public school handicapped programs. (DWH).

Identifiers—"Seattle Public Schools WA
Some of the variations, in reading achievement and fluency levels among bilingual students enrolled in the Seattle Public Schools are explained, and an examination of the effects of special language services (English as a second language and bilingual subject matter instruction) is emphasized. A models is presented which examines the relationships among the following variables: reading achievement, relative English fluency, special language services, family income, language background and grade level. Results indicated that the bilingual population is: (1) low in relative English fluency: (2) largely composed of Asian language groups; (3) lower in reading achievement and higher in math achievement than the national norm group; and (4) composed of high proportions of low income families. No, strong evidence was obtsined supporting the assertion that special language services have a consistent or positive effect upon reading schievement. A summary of the report is included. This report is a partial review of the Evalution Office of the Seattle, Washington School District's ongoing development of an evaluation method that can be used to compare schools, diverse instructioncan be used to this and a programs, or similar programs in different set-tings. The need for a method that can identify educational practices which result in student achievement gains is also emphasized in the review. This paper focuses on the examination of statistical methods that could be used to produce indices of academic gains and to develop a method for study. Reviewed is the evaluation methods selection processes that academic ess that produced a usable evaluation technique which subsequently identified schools showing large academic gains for the 1978-79 and 1979-80 school years. The report states that this method showed only a small number of schools with unusually large

of small achievement gains and concludes that few schools are likely to have school-wide educational program characteristics which lead overall achieve-ment anomalies. (Author/APM)

The Adult Reading Academy, a federally-funded service of the Phoenix Union High School District, serves native- and foreign-born adult students who are deficient in the basic skills of reading, writing, arithmetic, and oral communication. In 1980/81, the program served 476 students at 17 sites. Approximately 24 percent of the clients served were members of minority groups (principally Spaniss-speaking), the elderly, adjudicated youth, pregnant teenagers, or inmates of the women's prison. Student academic success was evaluated by the Wide Range Achievement Test. Three-fourths of the students who were pre- and posttested made the projected gain of one month in grade level per 25 hours of instruction. Many of the students also reported personal success at home and on the job. Inservice training was provided to both paid staff and volunteer staff members, 27 of whom contributed a total of 1417.5 hours to the program during the year: 10 five sites did not attract enough clients, and (2) approximately 20 percent of the students separated from the Academy without stating their reasons for leaving. Staff members reported difficulty in making follow-up contacts. A thorough evaluation of program effects is, therefore, difficult. (Author/KC)

The I liene Evaluation Data Form (UEDE) representations

The Using Evaluation Data Form (UEDF) represents a psychological lever for getting a program's decision maker to consider major evaluation findings. The form may be used at any point of the

evaluation process when sufficient data exist to supevaluation process when sufficient data exist to sup-port a finding deserving of action or reaction by the project staff. By local policy, it is required for inclu-sion in all end-of-year evaluation reports. Findings are results of evaluation activities conducted throughout the year. The process of the form's use is initiated when the evaluator lists, in draft form, findings the evaluator desires to be considered for possible action by the project manager. Findings are reported descriptively rather than judgmentally. In most instances, the evaluator will discuss these find-ings with the project manager. Each finding is ad-dressed by the manager, indicating the action taken, or to be taken. Justification for no action or action contrary to the findings, must be explained. The "Action" column represents the project manager's reply to the evaluation findings. An example form is reply to the evaluation findings. An example form is attached for review. The form is effective to the extent that the system requires the program people, be committed to a course of action in response to evaluation data. (Author)

ment tests administered in the Spring of 1961 to students in court-identified minority-isolated schools in San Diego, California. An introduction outlines the court order and describes the tests and the participating schools. In 28 of the 36 subject-grade level instances analyzed, student achievement on the Comprehensive Tests of Basic Skills met or exceeded interim goals, goals which reflect the rate of progess needed to attain the court specified objectives. Test results also revealed an increased per-centage of students performing at or above the national norm for reading, mathematics, and ian-guage. In conclusion, these test results show a high level of success for the instructional programs implemented in response to the court decision. (APM)

This is part one of the report of the San Diego
(California) Plan for Racial Integration, 1980-81.
Information is presented in four areas in order to
chart the progress made by the San Diego School
District. These include: (1) a census of students'
ethnic backgrounds: (2) the number of minority,
minority-isolated, and majority students in each integration program; (3) a comparison of the students
enrolled in the various programs with the goals for
the programs; and (4) integration indexes which reflect the exposure of minority to majority students
and assess the ethnic balance of the district's teaching staff. In addition, various specialized integration ing staff. In addition, various specialized integration projects such as race relations and oral communica-tion programs for staff are reviewed. Findings and conclusions are provided at the report's end. (APM)

This voluntary plan for the interdistrict exchange
of students responds to a desegregation court order
issued to the St. Louis, Missouri Board of Education. Among the criteria cited as necessary to the
operation of permissive interdistrict transfers were:
(1) eligibility of a student to transfer to a district and
school where the student's race is in the minority;
(2) determination of space availability by the host
district; (3) agreement by the host district to provide
the same educational services to the transfer student
as are provided its own students; (4) agreement by as are provided its own students; (4) agreement by participating districts to provide information on space availability by school and by grade; (5) the

right of eligible students to apply for a specific school in which space has been identified; and (6) agreement by participating districts to actively promote interdistrict transfer. Criteria for student selection, evaluation of building capacity and site selection for magnet schools and other special programs, staff exchanges, parent/community involvement, transportation policies, and administrative coordination are also examined. A discussion of finances includes an itemized budget summary for the plan. The budget also describes activities for the the plan. The budget also describes activities for the implementation of the plan over a three year period, and includes the estimated number of students involved during each phase. (JCD)

Presented here is volume one of a catalog developed by the Toledo, Ohio Public Schools and the Evaluation Center at Western Michigan University and designed as a tool for the evaluation of student growth and learning. The introduction and preface provide information concerning the development and use of these materials which are said to be suggestive rather than prescriptive in nature. Part one consists of a description of student behaviors in seven growth areas, which are divided into subsections within each area, and further divided into student traits. The seven growth areas are intellectual. seven growth areas, which are divided into subsections within each area, and further divided into subsections within each area, and further divided into student traits. The seven growth areas are intellectual, emotional, physical and recreational, aesthetic and cultural, moral, vocational, and social. Part two consists of a wide variety of measuring devices for the seven growth areas and for a range of age/grade categories which can be used to assess student performance. Three remaining sections facilitate the use of this document. The outline of classes section provides an overview of subsections in each growth area. A cross reference index gives an alphabetical listing of classes, categories, and characteristics keyed to the page on which the narrative by found and followed by the page number of all applicable measuring devices. Finally, the index of measures is organized to provide the page numbers of measures is organized to provide the page numbers of measuring devices by type and subject. (Author/JCD)

Program Evaluation, "School Community Relationship. Social Services, "Student Development, "Urban Programs Identifiers—"Cities in Schools

This is the final report of an evaluation of the Cities in Schools (CIS) program which was designed to ensure the delivery of educational and social services to inner city students; CIS uses the school as a base of operations. CIS contends that the current delivery systems are insufficient to meet the needs of youth due to lack of coordination, personalism, accountability and morale, according to this report. CIS's solution to this problem was reviewed in the light of the following assertions: (1) CIS will provide a superior structure and process for service delivery to disadvantaged youth; (2) the higher quality of service leads to significant, positive impact oh youth; and (3) these positive benefits can be achieved, without excessive increase to costs of the present delivery systems. Also discussed are problem reduction strategies versus solution building strategies in the evaluation of CIS, and CIS elements as part of the solution. A commentary by CIS on the issues that affected the program evaluation is appended. A discussion of the design of the study, which includes samples of caseworker and student interview forms, service delivery questionnaires, project histories, and other archival data from the evaluation are included in the appendices. This is a teacher's manual describing the activities of Detroit, Michigan's Ethnic Literacy Project and providing resource materials and classroom techniques for teaching ethnic heritage. The manual states that the Ethnic Literacy Project was intended to supplement the Detroit Objective Referenced Tests (DORT) Reading System. This system, the manual continues, was designed tordevelop comprehensive reading skills among students in all grades. Contained in the manual is a test for students to determine their knowledge about the history and culture of Detroit's many ethnic groups. The manual also contains lists of resource materials available from both general sources and from DORT. These materials include books, recordings and films. Various resource centers' addresses and sample suggested activities for extending ethnic literacy to basal readers are also included. A bibliography of books on ethnic subjects primarily for elementary school children, and a list of DORT Comprehension Objectives for grades 3 through 8 concludes the manual. (APM) al. (APM)

This is an administrative guide for bilingual/bicultural education programs in the Detroit, Michigan, public schools. The first section of the guide provides background on the legal mendate for bilingual education. Section two discusses the identification and selection of limited English-speaking ability pupils for bilingual services. The third section reviews issues pertinent to the selection and maintenance of qualified bilingual education personnel. In section four, the selection of an appropriate educational design is considered through the analysis of six potential bilingual classroom models. Section five covers parent and community participation, and section six offers lists of resource materials, and consultant personnel. Extensive appendices include: (1) a discussion on the historical development of bilingual/bicultural education; (2) the text of Michigan Public Act 294 (1974); (3) a pupil profile form; (4) sample letters to parents in several languages; (5) job descriptions for central and regional program personnel; and (6) a glossary of terminology. The One Major at a Time (CMAT) dropout program implemented for ninth and terth graders by the Chicago, Illinois public schools is examined in his second year study, A description of the program includes information on its purpose, organization, instructional methods, student population, and objectives. Data on findings compare OMAT students with a control group of other high risk students in each of the program objective areas: (1) dropout rate: unexcused absences, and discipline referrals; and (2) grade-point averages in major subjects and reading achievement. Also included are summaries of student and teacher evaluations of OMAT. Recommendations for program improvement are siven in the areas of inservice program predeauvilia. Recommendations for program improvement are given in the areas of inservice program needs utiligiven in the areas of inservice program needs utilization of the reading laboratory, grading practices of OMAT, methods of measuring student attitudes, and selection of control groups. The report concludes that definite progress was made in several areas and cites higher reading achievement and student self-esteem, and lower dropout rates among OMAT students. Appended to this report are samples of the Self-Esteem Inventory test, survey of School Attitudes test, and My Views of the OMAT program test administered to students as well as a teacher perception questionnaire completed by faculty. This report examines some myths and stereotypes

types, "Teacher Responsibility, Urban Education, "Urban Youth"

This report examines some myths and stereotypes in the light of factual information about cultural and learning characteristics of minority group children in urban school settings. Cited among the most prevalent myths are that the academic failure of urban children results from genetically determined intellectual inferiority, and that the failures of urban school children may be attributed to pathological sometinfluences. Also examined are minority group family characteristics, and parent and teacher responsibilities and attitudes which are said to influence educational objectives and affect the cutual outcomes of education in the urban school. Role clarification is identified as a critical factor in the achievement of success. It is further suggested that evaluation and change are needed in the following problem areas: (1) the biases of standardized tests; (2) the irrelevancy of textbooks; (3) the incompetence of school administrators; and (4) the inadequacy of present systems intended to evaluate the teaching process. School Community Relationship, "School Funds, "Urban Schools
This paper presents the results of an exploratory study of the process of mobilizing and allocating resources for desegregation in large cities. Examined were the effects of budgetary constraints on school desegregation and desegregation impact on educational finance. Four urban school districts were selected for site reports. Section one of this study reviews the literature pertinent to the conceptualization of the research questions. Section two reviews and discusses methodological aspects of the study. Section three describes the findings in the school districts selected for study. A concluding section presents summary observations about relationships between budgets and desegregation. Presented in the site reports are: (1) an historical overview and assessment of current financial status; (2) issues related to school closing and facilities overview and assessment of current financial status; (2) issues related to school closing and facilities plans; (3) issues-related to the funding of magnet schools, staff development, multicultural curricula, and other programs related to desegregation; and (4) funding needs in the areas of transportation, safety and security, and school-community relations. This paper suggests that the broader political, economic, and legal ramifications of desegregation need to be considered in fiffance reform and policy formation: Also emphasized is the importance of communication among school boards, State and Federal legislatures, and individual school officials in the development of financial policies related to school desegregation. Identifiers Wisconsin (Milwaukee County)

This pilot study examined the interrelationships between school desegregation programs and housing patterns in Milwaukee County, Wisconsin. First, a field study explored the attitudes of minority families participating in the city-suburban school desegregation program which involved city-suburban pupil transfers. Secondly, the pupil movement under the city and metropolitan desegregation plans was assessed for its impact on segregated residential housing patterns in the community. The third aspect of the study analyzed the two largest Federal rental housing programs operating in the county for their impact on racial integration of schools and housing. The study indicates a need for more coordinated efforts by school and housing officials if successful, long-range integration is to occur. (Author/ML) This pilot study examined the interrelationships long-range integration is to occur. (Author/ML)

The methods and process of desegregation between 1968 and 1976 were analyzed for 52 large school districts in this case survey report. The first section presents the research design in which the case survey method and the selection of 52 districts are considered. The second section includes a detailed look at the various desegregation technique employed and a preliminary assessment of their eftailed look at the various desegregation techniques employed and a preliminary assessment of their effectiveness. A multivariate analysis is presented in section three. An analysis of white flight is presented in section four, and section five discusses findings and implications of the study. The report drew the following conclusions about desegregation success: (1) Federal coercion reduced racial isolation; (2) larger districts achieved less racial balance than amaller districts; (3) southern districts had greater success than those outside the south; (4) countywide districts improved racial balance more than non-countywide districts. (5) support from school wide districts improved racial balance more than non-countywide districts; (5) support from school officials helped achieve desegregation; and (6) hiring new superintendents tended to improve prospects for desegregation success. Included in this report are five appendices: (1) the form for the case survey instrument; (2) a glossary of desegregation terms; (3) additional comments about survey reliability; (4) case profiles; and (5) selected school district characteristics. Data from four case studies of urban vocational
education and a National Opinion Research Center
survey of high school sophomores and seniors were survey of high school sophofitores and seniors were used to research the role of vocational programs in managing the transition from school to work. The case study cities were Atlanta, Chicago, Rochester, and San Francisco. It was found that vocational education must provide students with skills and contacts to successfully manage the transition. Informal contacts were particularly important for negatively stereotyped groups, specifically young adults. Ways of managing the transition were varied among postsecondary, secondary, and Comprehensive Employment and Training Act programs in urban areas. Congressional efforts to regulate program direction as mandated in the Vocational Education Amendments have had little effect. Federal funds were being used largely to maintain existing pro-Amendments have had little effect. Federal lunds were being used largely to maintain Existing programs and equipment. Procedural compliance with federal planning provisions was occurring. Program evaluation relied on traditional approaches with school officials in control. Local response to sex fairness provisions was quite limited. Local advisory. fairness provisions was quite limited. Local advisory councils have involved the private sector. It was recommended that through modification of federal vocational education policy Congress (1) emphasize contacts with the marketplace. (2) eliminate systems of institutional stratification, (3) encourage cooperation between programs and institutions, and (4) introduce greater variety. (YLB)

This paper examines strategies for urban school, improvement within the realm of preschool, elementary, and secondary level programs, and systemwide programs. Examples of programs in each grade level area which are operating in different parts of the country are given. The following elements are identified as common to all successful programs; (1) well-organized and carefully executed plan; (2) dedicated staff; (3) diverse and interesting curriculum; (4) small size; and (5) clear and familiar goals. Parent, teacher, and student responsibilities are discussed, and the need to improve information utilization strategies within the school system is stressed. (JCD)

This paper reviews a New Haven, Connecticut
school intervention project as a model for replication in other schools. The functions of a school advisory committee, parent participation, a mentalhealth team, and a social skills curriculum are described as the principal components of the project.

health team, and a social skills curriculum are described as the principal components of the project. The need for preservice as well as inservice training for staff development is discussed with emphasis on the role of a primary resource person who, as a social science educator, would act as a change agent in the schools. It is suggested that there be three elements of training; (1) a released project in which teachers and administrators receive instruction in research methodology and its application and utilization in school problem solving; (2) staff seminary on child development, applied mental health practices, and curriculum development; and (3) a staff practicum for principals. al Courts, Legal Responsibility, Voluntary Desegregation Identifiers—Boston Public Schools MA, Denver Public Schools CO
This volume examines ten communities with histories of lengthy desegregation litigation in order to gain insight into the perceived legal adequacy and practical effectiveness of various desegregation strategies from the point of view of/the Federal courts. A conceptual model of the judicial review of desegregation plans is given in diagram form with accompanying text. Reviews of each community are included under two major categories: (1) those concerned with pupil or staff desegregation; and (2) those which focus on non-reassignment or ancillary measures to achieve desegregation and remediation those which focus on non-reassignment or ancillary measures to achieve desegregation and remediation of past discrimination. Under each category, a number of specific strategies are identified, defined, and analyzed according to their legal adequacy and effectiveness in the selected communities. A summary of an in-depth analysis of two communities (Boston, Massachusetts, and Denver, Colorado), which is said to provide understanding of the logic used by the courts and to illustrate the interaction among educational benefits, demographic factors, and equity considerations, is provided in the appendix. As part of a nine-volume, six-state study of the

Dist, Serrano v Priest
As part of a nine-volume, six-state study of the impact of school finance reform on minorities and the poor, this report describes the history of court litigation concerning finance reform. The report's first part traces school finance reform from roughly 1900 through 1971 and summarizes parallel reform efforts by racial and ethnic minorities and the hand-capped to secure adequate and nondiscriminatory schooling. The second part focuses on the decisions about fiscal neutrality in the cases of Serrano v. Priest and Rodriguez v. San Antonio Independent School District and goes on to discuss other school finance cases that do not involve fiscal neutrality. In the final section the author examines the issues that the final section the author examines the issues that the final section the author examines the issues anal remain open in school finance reform and minority group litigation, including the question of whether, fiscal neutrality, state constitutional provisions, or federal rules may advance the educational interests of urban and minority pupils. Identifiers—"Equity (Education), "Fiscal Neutrality, School District Wealth
In this concluding volume of a nine-volume study of the impact of school finance reform on the poor and minorities, the author summarizes the project methods, variables, findings, and conclusions about reform in the six states of California, Colorado, Florida, Michigan, New Mexico, and Texas. He first discusses the two general approaches to finance reform-social equity (equalizing expenditures) and fiscal neutrality (equalizing fiscal opportunities). The variables studied include educational resources, district wealth, tax effort, income, ethnicity, and urban location. These were analyzed at the district district wealth, tax effort, income, ethnicity, and urban location. These were analyzed at the district

level and the school level (in Florida only) using level and the school level (in Florida only) using correlations, percentiles, and measures of central tendency. Among the findings are that finance reform slightly decreased spending disparities and wealth discrimination, slightly increased fiscal neutrality, and made little change in revenues for poor and minority students. In Florida the study found greater spending disparities and ethnic concentrations at the school level than at the district level. The author concludes that finance reforms/caused only stight improvements in social equity or fiscal. a ne author concludes that mance retorms-caused only slight improvements in social equity or fiscal neutrality and that reforms simed at wealth neutral-ity will not necessarily benefit poor and minority students because such students are not always con-centrated in low-wealth districts. the initial impetus of bilingual education dillers dis-tinctly from desegregation in that the bilingual ap-proach requires separate special treatment. The degree of divergence between desegregation and bilingual education must be considered and deter-mined in light of the limited resources and compet-ing priorities of each case. In Hartford, Connecticut, concentrations of Puerto Rican and black students constitute a virtual unanimity in certain schools and a clear majority in the city. Puerto Rican pupils suffer more severe disparities than black students with respect to verbal academic achievement, eduwith respect to verbal academic achievement, edu-cational enrollment, and self-concept. Poverty of Puerto Ricans results in overcrowded housing and ill health. In 1970-72, the Hartford School System instituted a pilor bilingual program which has evolved into a complete bilingual elementary school, including bilingual classes from preschool to sixth grade, a bilingual special education resource center, and a staff development program which ex-tends to other schools in the city. The Hartford system beaun to develop a policy statement, assess system begun to develop a policy statement, assess parent involvement, and develop a testing and evaluation design. Because both desegregation and bilingual education are crucial to minority students, when and how to implement each remedy must be carefully considered. (CM)

This report on the effects of court-ordered desegregation in the Dallas (Texas) Independent School District is divided into three major sections. The first updates national desegregation literature. The second section outlines briefly the history of desegnment regation in Dallas schools over the past ten years, and discusses the court's intervention in the 1976 plan in relation to school enrollment-patterns, student assignment and ethnic distribution. The effects of desegregation on student achievement are examined in the third section. Median percentile rankings and gains for white, black and. Hispanic students are reported by grade; subject and subdistrict. (JCD)

This report examines the Chicago Mastery Learning Reading Program (CMLRP) and other school-wide approaches at selected schools in Los Angeles (California). New York City, and Chicago (Thinois) to identify factors in augmented achievemest aims. This extended summary and conclusion seeks to provide information which can improve the general effectiveness of inner-city elementary and intermediate schools. Chapter one presents CMLRP components and potential advantages for big city students. Chapter two discusses CMLRP implementation in New York Community District 19 by giving the program's history and chronology, district-level instructional and organizational processes, and data on reading achievement. CMLRP implementation at individual schools in New York and Chicago are compared in chapter three. Chapter four describes five schools using schoolwide approaches in Los Angeles and Chicago to improve instruction for students in consentrated poverty

neighborhoods. Schoolwide approaches are defined as elimination of Title I pullout arrangements that fragment the education of low achievers. Finally, chapter five summarizes and discusses those school arrangements and processes identified with im-proved achievement in inner-city elementarys achools (ML)

The study evaluated the identification process for programs for the gifted and talented in the District of Columbia public schools. The authors (McBeath, Blackshear, and Smart) used the Bajdwin Identification Matrix (which includes an informal creative

Blackshear, and Smart) used the Bajdwin Identifica-tion Matrix (which includes an informal creative thinking test, reading and mathematica tests, grades, and nominations) as a data management system. The 205 students identified were compared with a random sampling of 205 students not selected for the program. Results of the first discriminant anal-ysis indicated that the highest contributor to iden-differation was test to highest contributor to identification was total nominations (peer, parent, and teacher). The next three contributing variables in descending order were peer nominations, mathematics, and parent nominations. When socioeconomic status was added as a variable, there was no commence, and parent nominations. When socioeconomic status was added as a variable, there was no change in the top discrimination coefficient suggesting that socioeconomic status did not play a very important part in the selection process though it did influence the structure of the discrimination function. When students who stayed in the program were compared with students who did not, total nominations was still the predictor variable contributing most to the function, followed, however, by reading, creative thinking, and mathematics. When socioeconomic status was considered, the variable contributing most to identification of students who stayed in the program from those who didn't was creative thinking, followed by parent nominations, socioeconomic status, and reading. lization

A project for studying ways to optimize utilization of evaluation products in public schools is reported. The results indicate that the negative picture of userevalent in recent literature stems from the unrealistic expectation that local decision-makers will behave in a classically rational manner. Such a view behave in a classically rational manner. Such a view ignores the political settings of real world evaluation use where the non-use of results may constitute a viable and "rational" alternative. Empirical research has suggested that results are used and in a variety of ways. Factors that have not been demonstrated to affect use include the methodological quality of the evaluations and the timeliness of its

2**2** / /

report. Factors that do seem to affect use include the report, ractors that do seem to affect use include the report source, content, and receiver; political considerations; and the "personal factor," i.e. the presence of at least one person who cares about the evaluation and its results. A collaborative approach to evaluation capitalizes on the factors that have been shown to affect use, although the practicability of such an approach at the local level may make it unfeasible. This handbook was, prepared to provide guidance and suggestions primarily for school officials who are developing a plan for school desegregation or who are trying to revise an existing plan. Indications of what has and has not worked in other districts are based on experts' recommendations, on case studies from other communities, and on the findings of a research project that examined school desegregaresearch project that examined school desegrega-tion in 52 American cities. Chapter one describes research project that examines action in 52 American cities. Chapter one describes some publications that can serve as practical guides to school desegregation. Chapter two examines the historical and legal context of school desegregation by reviewing early count casts and desegregation policy standards that emerged from them, changes that have taken place in schools over the years, and the issues of white flight and metropolitan plans in connection with desegregation. Chapter three deals with strategies and techniques, and reviews findings from experience and research of practices which yield the best results. Chapter four discusses issues and problems involved inbusing. Chapter five considers the public leadership role in school desegregation. A concluding chapter summarizes the handbook. Appendices include some guiding principles for desegregation planners, a directory of desegregation assistance centers, and information on how to locate court decisions. (Author/MJL)

Grades awarded to secondary school students in
the Cleveland (Ohio) public schools were analyzed
to determine relationships between grades and selected school climate variables in a desegregated
urban school district. Failures or F grades and
schoolwide non-promotion rates were both related
to rates of class attendance and school suspensions.

Ourse these fourths of school failure tree was tree. schoolwide non-promotion lates, were don't etated to rates of class attendance and school suspensions. Over three fourths of school failure rates was explained by the attendance rate, suggesting that improving school attendance may reduce failures. The proportion of white students in a school appeared to be a factor related to the f-ilure rate; as the proportion of whites increased, numerically the minority), the failure rate decreased. This finding supports the argument for desegregation. Schools with high failure rates on such variables as attendance rates, non-promotion rates for the total population, for blacks and for whites, reading test scores, the discrepancy between minority reading scores, and white reading scores, suspension rates, average grades by subject, and percentage of each grade awarded. Results indicate a need to introduce changes, such as improvement of class attendance enaintenance of racial balance, and establishment of performance standards in these schools. (MJL) performance standards in these schools. (MJL)

Previous research shows that school desegregation has had both positive and negative effects on
students, and that desegregation effects have been
variously determined by the type of desegregation,
the desegregation methods used, and the region in
which desegregation was implemented. A study of
the effects of court-ordered desegregation of
minority students in the Austin, Texas, Independent
School District compared student achievement

gains as a function of ethnic group (white, black, or Hispanic) and reassignment status (reassigned or nonreassigned) of urban school children in grades two through eight. Results indicated that in five out of seven grade levels, reassigned minority students made smaller gains in both reading and mathematics than their nonreassigned peers. In contrast, reassigned white students gained more than their nonreassigned peers in five out of seven levels in mathematics and in four out of seven levels in reading. The findings suggest that the proportion of minority, students in a class and the issues of white flight and culture shock may influence differential flight and culture shock may influence differential flight and culture sheet may instruct a chievement gains among students. It is further suggested that massive busing of either white or minority students may not be the most efficient way to enhance minority student achievement. (Author/

Equity in vocational education cannot be addressed until the question of urban cultural pluralism has been fully analyzed. This question involves problems of minorities, the disadvantaged, and those with limited English proficiency. Barriers facing urban youths enrolling in vocational education include close-knit ethnic pockets attempting to adhere to their own culture, dropping out before expessure to vocational education, and labor market changes (automation, immigrant workers, later retirement, large rural industrial parks, and increased numbers of working women). Strategies to

eliminate barriers include caring teachers, administration and school board willingness to fund alternative methods and situations for problem students, remedial programs, and early instruction in employment and coping skills. Seven detailed solutions are teaching basic skills with meaning for the world of work, teaching employment skills, teaching job seeking skills, placing students in part-time civil service jobs, appointing state equity coordinators, restructuring jobs, and cultivating collaboration of social and community agencies with vocational educators. Areas for further research and policy consideration are federal government role, vocational education evaluation criteria for job placement, and delivery systems corresponding to needs of subcultures. (YLB) eliminate barriers include caring teachers, adminis-

*New York Citywide Reading Test'

This summary of the history and current workings of the New York Citywide reading test program emphasizes the educational consequences of it. The testing program has become controversial since its inception as a political compromise for school district decentralization. It 'seems to have become overly influential because children are prepared for the reading test and coached in test-taking techniques. This preparation places undue emphasis on reading over other areas of the curriculum. The program was officially described in 1977 as serving several functions for which it was jnappropriate. These were evaluating federal reimbursable programs and determining pupil class assignments. The program has since been depicted as serving other functions such as teacher evaluation and diagnosis of pupil reading skills. Major problems have been created because the program's functions are in conflict. Using the test as a means to evaluate teachers conflicts with its function of providing diagnostic information for teachers on pupil reading skills. The authors recommend focusing the Citywide Test on the function of public portrayal of the city school system, fulfilling other functions that the Citywide Test now serves/and encouraging new directions for educational assessment in city schools. The School District of Philadelphia, Pennsylvania, was ordered by the Commonwealth Court to begin a voluntary desegregation process, the school district applied for and received grants from the Emergency School Aid Act (ESAA) to develop

programs around eight basic models: pairing, enrichment, middle school alternatives, music and art programs, multilingual/multicultural programs, student concerns, child development centers, and curriculum magnets. The desegregation plan showed success on several levels. Despite a declining enrollment and the closing of some schools, the number of desegregated students and schools continued to increase. Students, teachers, and parents had positive impressions of the desegregation programs with which they were associated. Student interpersonal and intergroup relations improved significantly, and over half of the students who had been in desegregation programs for 2 years maintained or improved tion programs for 2 years maintained or improved their national percentile ranks in reading and maththeir national percentile ranks in reading and mathematics. As more students continue to participate in voluntary desegregation programs, the school district should increase efforts to develop more attractive programs and to create integrated environments within the desegregated schools. While affective scales designed to measure students' attitudes toward reading have become animportant part of teachers' assessments of student performance, little research has been conducted to determine whether these scales provide accurate information, nor have researchers adequately compared reading attitudes according to atudent achievement and socioeconomic levels. To provide evidence regarding these areas, two studies were undertaken involving more than 300 students, half from an inner city school and half from a suburban school. In the first study, the reading attitudes of the students were measured by the Estes Reading Attitude Scales and the results were compared according to grade, school, achievement level (low or average), and sex. In the second-study, students who had indicated a positive attitude toward reading in the first investigation were given a polygraph test to determine if they had expressed their true attitudes. The results of the first study revealed that average achieving students and those in the inner city school had more positive attitudes toward reading than their peers. No effects were found for either grade or sex. Results of the second study revealed that half of the students in the low achieving group were not truthful in assessing their attitudes, while only one student in the average achieving group were not truthful in assessing their attitudes, while only one student in the average achieving frou per end truthful

Descriptors—"Culture Conflict, "Economically Disadvantaged, Ethnography, "Peer Groups, "Puerto Rican Culture, Social Differences, Sociolinguistics, "Urban Schools, "Values This discussion takes the view that poverty and school failure are not the regults of natural disabilities, but rather they are the result of a conflict in our society between two opposed cultures; and that the conflict will not be resolved in any favorable way unless, the dominant culture recognizes the values of the dominated culture, and changes its way of dealing with it. Ethnographic data of peer groups in Harlem are described to document the existence of the conflict between the value systems of the members and value systems of the schools. Analysis of the data gives weight to the view that it is the conflict of values and social systems that is the primary

cause of reading failure, not the intelligence ability or family background of the children in school. A study of the sociolinguistic characteristics of Puerto study of the sociolinguistic characteristics of Puerto Ricans of East Harlem closely parallels that of the peer groups in South Central Harlem. Study of linguistic change in northern speech communities shows competing value systems among whites also. The position is taken that many values associated with vernacular culture are more suited to the learning process than the current standard school system values. The individualistic and competitive techniques and expectations of the school system contrast with the close group cooperation and motivation that are encouraged in groups. (AMH)

ods. Evaluation Needs, Evaluators. *Program Evaluation Identifiers—American Institute for Research, *Evaluability Assessment Studies were conducted by the American Institute for Research (AIR) under contract with the Department of Education (ED). An evaluability assessment determines the extent to which a program is ready for evaluation, the changes needed to make the program more manageable and accountable, and toward what questions a more extensive evaluation might usefully be directed. The evaluators must learn about a specific program before performing a responsible evaluation. However, at the same time, the program staff should be educated about evaluability assessment and methodology. If this is neglected, potential benefits from participating in the study are lost. Input from project managers is necessary to insure that programs are accurately portrayed. An evaluability assessment is an evolving concept which requires informed and responsible flexibility. The extent to which consensus exists on program objectives, major program activities, or appropriate measures of performance must be determined. Evaluators interview individuals with different perspectives on the program. The analysis of these interviews provides important information. On site data collection includes formal information as well as informal data gained through anecdotes and impressions. (DWH)

The prospect of simultaneous cuts in Federal and State aid to public school education in some States poses a scrious threat to large cities which suffer financial stress and face the added responsibility of educating large numbers of poor black and Hispanic children, Financial needs that might result from cuts in Federal aid cannot be met by State and city governments which, surveys show, face fiscal pressures of their own, Furthermore, central city public schools are experiencing a weakening political position because the majority of children who presently depend on public education are from disadvantaged minority groups and are not the children of people who control the economy and politics of the city. These sweeping changes demand that research in large city school districts address not only fiscal and management issues, but also the nature of urban societies, the future of public institutions, and the impact of budget cuts on students and the staff who make, the schools function. A study was carried out to investigate the organizational determinants of student achievement in 52 Newark, New Jersey, public elementary schools. Data consisted of information collected from questionnaires (for principals, teachers, and students) and school records, and of student reading and math achievement scores. Variables found to have a direct effect on student achievement included; (1) flexibility in grouping; (5) student attendance; (6) flexibility in grouping; (5) student attendance; (6) teacher absenteeism; (7) teacher commitment; (8) student morale; and (9) student aspiration. Variables found to have an indirect impact on achievement were staff competence; job codification; amount of communication and administrative support; teacher support of students; and frequency of administrative evaluation of teachers. The socioeconomic makeup of the student population was also found to affect student achievement and to affect organizational attributes of schools. (GC)

The report describes these four program components: 1) the Elementary Early Intervention Program to provide preventative services for students with absentee and school behavior problems; 2) the School Awareness and Adjustment Program for middle school students with adjustment difficulties in a large school environment; 3) the Elementary Developmental Gujdance/Human Relations Program to promote positive student intergroup and intercultural relationships; and 4) the School Awareness and Intervention Program to reduce the overrepresentation of minority students involved in suspensions and other disciplinary actions at the high school level. Evaluation results indicate general improvements in classroom adjustment, self concept, and school awareness among targeted students, and decreased absentee and suspension rates. Data on the extent of parental involvement, attendance at teacher workshops, and teachers and administrators' perspectives on the project are included. Recommendations concerning groject, objectives, data collection, and project scope are made. (MJL)

Identify the development of reprivate leadership in correcting the situation. Identi-fied as a major influence in the development of raprivate reacership in correcting the situation, the third as a major influence in the development of racial alienation is the urban renewal program which pushed large numbers of blacks out of their traditional neighborhoods and into isolated and severely deteriorated areas. Other manifestations of black isolation include high unemployment and a lack of access to job training and advancement, adequate housing, the justice system, and equal educational opportunities among the city's black and minority population. It is concluded that solving Miami's problems requires a coordinated effort of public and private sectors to eliminate the underlying causer of racial isolation. Such efforts, it is maintained, should be directed toward dropout prevention; maximum school desegregation; efficient vocational and bilingual instruction; improved housing conditions; affirmative action in employment; and provision of greater access to the juvenile justice system and related services. Identifiers—"Alternatives to Corporal Punishment
This compilation of disciplinary strategies was put together to help Saint Louis (Missouri) Public Schools teachers and administrators explore ways to deal with inappropriate, unacceptable, or disruptive student behavior without using "corporal punishment. The district had earlier officially discontinued the use of corporal punishment. The manual's first thice sections discuss the issue of corporal punishment, methods of effective classroom management, and the classroom environment's effect on student behavior. Each of the next nine sections describes and discusses a disciplinary strategy and suggests how to implement it. The strategies covered include assertive discipline, detention, use of reinforcement and punishment, behavior contracts, use of support services personnel, parent involvement, the social discipline model, group process techniques, and working with individual students. Section 13 presents a small booklet of pointers on classroom discipline. Suggested readings are provided in section 14, as well as at the end of several of the topical secsents a small booklet of pointers on classroom disci-pline. Suggested readings are provided in section 14, as well as at the end of several of the topical sec-tions. The manual's concluding pages briefly de-acribe the district's Office of Special Student Concerns and tell district personnel how to request its assistance. (RW)

Identifiers—Louisiana (New Orleans), State Regulation

Discussed are the procedures implemented in the Orleans Parish Schools in response to the Louisiana state-mandated promotional testing program (Act

750, 1979), and concerns regarding its value. Re-750, 1979), and concerns regarding its value. Recent findings raise fundamental questions about whether an exclusively skills-focused curriculum in the early years provides the needed grounding in context learning and conceptual analysis for skills to be productively applied as children grow older. Absorption with the promotional aspects of the Basic Skills Test may overly focus attention on promotional testing causing the comprehensive curriculum to give way to a curriculum of 30 testable objectives. Because state funds granted for remediation are to be used only for students who fail the promotional tests, summer programs must be established, thus causing a duplication of already existent remedial programs, as well as planning and logistical time programs, as well as planning and logistical time constraints. No dollar ligure has been proposed for the cost of this mandated effort in staff and teach time of for the problems of test administration. The discussion concludes by urging testing proponents to consider whether the costs involved with such testing override the benefits and to keep alert to the need to make programmatic adjustments as they become necessary. Identifiers—New York City Board of Education This report describes, provides demographic data for, and evaluates a bilingual program for Spanish speaking students at Walton High School, the Bronx, New York The program, serving 204 Hispanic students in 1980-81, emphasizes English preparation in order to enter the job market. The instructional component is interdisciplinary in scope and transitional in nature: there are eight levels of English language instruction, two levels of remedial Spanish and three levels of regular Spanish; native culture is taught in the social studies and language curricula; bilingual instruction (including courses in career education and exploration) or English instruction is 'available in some content areas; and student placement depends upon the level of English language proficiency. Noninstructional components are concerned with curriculum and materials development, aupport services, staff development, parent and community involvement, and students affective domain. Evaluation of the program shows students making progress in both English and Spanish while their attendance rates were viewificantly higher than the whole school and students affective domain. Evaluation of the program shows students making progress in both English and Spanish while their attendance rates were significantly higher than the whole school population. Recommendations for more effective implementation of the program in the future con-clude this report. (MIL)

Evaluation (Individuals), *Services, *Visual Impairments

Evaluation (Individuals), "Services, "Visual Impairments
The study examined the effects of an inservice program for nine resource and eight itinerant thachers on skills of regular classroom teachers in meeting needs of visually handicapped students enrolled in their classes and supportive services provided to classroom teachers by resource and itinerant teachers. An introductory chapter covers background of the study, statement of the problem, need for the study, statement of purpose, review of the literature, hypotheses, and delimitations. The research design, covered in a second chapter, included a survey of study, statement of purpose, review of the literature, hypotheses, and delimitations. The research design, covered in a second chapter, included a survey of classroom teachers, a survey of resource and itinerant teachers, and an objective test of knowledge administered to resource and itinerant teachers. The third chapter presents results of statistical analysis relating to the research hypotheses, results of supplementary analysis of classroom teacher skills and supportive services provided by resource and itherant teachers, subjective written comments by classroom teachers, and evaluation of the harrvice class by participants. Chapter 4 offers findings, conclusions, and recommendations which include: the inservice program was effective in increasing the self-confidence of classroom teachers relative to maintaining realistic expectations for their visually handicapped students; the program did not have impact on classroom teacher evaluations of supportive services; and the type of school in which itinerant teachers worked had no effect on self evaluations of itingrant teachers. Appended are sample survey forms, evaluation forms, responses, comments, and tables with statistical data. (SB)

Identifiers-California, Lau v Nichols

This second annual year-end report summarizes the efforts of administrators, teachers, and students in the Los Angeles Unified School District on behalf of children whose primary language is not English, it documents the district's response to the January 1974 Supreme Court decision in Lau v. Nichols. 1974 Supreme Court decision in Law v. Nichols. The response is embodied in programs for national origin minority students in English as well as in the native language. Following an introduction describing the district and the project history, the report is organized according to the major divisions of the school district's Law plan: (1) identification of national origin minority children and assessment of their needs; (2) elementary programs; (3) secondary programs; (4) special education programs; (5) staffing activities; (6) staff development programs; (7) community involvement program; (8) administrative organization for implementing the Law Plan and supportive monitoring procedures; (9) counselling and psychological services; (10) other support services, including health, student adjustment services, uppil services, attendance, and educational options; and (11) evaluation activities. The appendices include tables of numerical details referenced in the narrative section, a reader's glossary of special narrative section, a reader's glossary of special terms and acronyms, and forms and instructions used in gathering data. Identifiers—New Jersey (Newark)

This curriculum guide provides a detailed description of the program in English as a second language (ESL) in the Newark Public Schools. After an introduction that describes the audiolingual method of

(ESL) in the Newark Public Schools. After an introduction that describes the audiolingual method of
teaching foreign languages and that defines briefly
the cognitive approach to language instruction and
the "silent way," the guide presents the material in
seven parts. Parts two and three deal with the
philosophy and goals of ESL in Newark. The greatest part of the guide is devoted to: (1) teaching
methods and techniques; (2) development of levels
and objectives for listening and speaking, reading,
writing, and culture; (3) and appendices which provide a large number of class activities and devices.
The emphasis is on making the techniques and activities usable by teachers. Each activity is clearly
described with regard to procedure and necessary
materials; numerous examples of class exercises are
provided. Evaluation forms for use by teachers and
a bibliography complete the volume. (AMH)

Identifiers—*Foster (Herbert)
In this paper, William Wilbanks discusses Herbert Foster's "Ribbin', Jivin', and Playin' the Dozens," a book on the relationship between inner city youth and their teachers. The book's title derives from three types of games often played in the classroom: ribbing, a verbal game of taunting other students or the teacher; jiving, which involves manipulative techniques to protect oneself from trouble; and playing the dozens, in which contestants insult one another until one gives up or resorts to violence. According to Wilbanks, Foster's thesis is that in inner-city schools there is a culture gap between largely black, lower class youth and their largely white, middle-class teachers. Students, behaving according to the rules of their streetcorner subculture, constantly play games to test teachers who misinter-pret the games as forms of disruptive behavior. cording to the rules of their streetcorner subculture, constantly play games to test teachers who misinterpret the games as forms of disruptive behavior. Hence, Foster maintains, educational failure islargely due to teachers' inability to understand the students' subculture. Wilbanks criticizes Foster as being rather too critical of the teacher, and as having neglected the students' role in understanding the teachers' perspectives. Moreover, Wilbanks notes that several of Foster's statements are insufficiently explained. Nevertheless, Wilbanks finds Foster's points valuable in understanding not only inner-city students but also criminals and prisoners who play similar games. (Author/MJL)

Identifiers—"Cleveland Public Schools OH
This report presents supplementary findings of a
study on disparities in reading test scores between study on disparities in reading test acores between white and minority students in Cleveland, Ohio, public schools. Phase four results indicate that; (1) proportions of declining reading scores were greatest in those grades where reassignment due to the desegregation plan and building structures was greatest; (2) lowest pretest scorers performed better on the posttest than students in general, suggesting the effectiveness of compensatory education programs for low achievers; (3) among the lowest pretest scorers, whites did better on the posttest than minorities; (4) the top third of students performed poorly on the pretest compared to the national norm minorities; (4) the top third of students performed poorly on the pretest compared to the national norm but did better than expected when compared with the Cleveland Public Schools norm; (5) the middle group of students performed poorly on the pretest than predicted from overall student performance; (6) a special regression analysis yielded a statistical significant gain for whites but not for minorities, among students who had attended THINK, a remedial reading program; (7) THINK students, who scored lowest on the pretest did better on the posttest than a comparable group of non-THINK students, but the reverse occurred for the highest scorers, suggesting that low performing white students benefitled most from THINK; (8) higher achieving students out-migrated at a greater ratedents benefitted most from Prink; (6) ingner-achieving students out-migrated at a greater rate-than lower achievers; and (9) family income was a more significant predictor of student out-migration than race. GENERAL INFORMATION

PRICELIST

The prices set forth herein may be changed without notice, however, any price change will be subject to the approval of the National Institute of Education Contracting Officer.

2 PAYMENT

The prices set forth herein do not include any sales, use, excise, or similar taxes which may apply to the sale of microfiche or hard copy to the Customer. The cost of such taxes, if any, shall be borne by the Customer.

Payment shall be made net thirty.(30) days from date of invoice. Payment shall be without expense to CMIC

3 REPRODUCTION

Express permission to reproduce a copyrighted document provided hereunder must be obtained in writing from the copyright holder noted on the title page of such copyrighted document.

4. CONTINGENCIES

CMIC shall not be liable to Customer or any other person for any failure or delay in the performance of any obligation if such failure of delay (a) is due to events beyond the control of CMIC incuding, but not limited to fire, storm, flood, earthquake, explosion, accident, acts of the public enemy, strikes, lockouts, labor disputes, labor shortage, work stoppages, transportation embargoes or delays, failure or shortage of materials, supplies or machinery, acts of God, or acts or regulations or priorities of the federal, state, or local governments, (b) is due to failures of performance of subcontractors beyond CMIC's control and without negligence on the part of CMIC, or iciss due to retoneous or incomplete information furnished by Customer.

5. LIABILITY

CMIC's liability, if any, arising hereunder shaft not exceed restitution of charges.

In no event shall CMIC be liable for special, consequential, or liquidated damages arising from the provision of services hereunder.

K WARRANTY

CMIC MAKES NO WARRANTY, EXPRESS OR IMPLIED. AS TO ANY MATTER WHATSOVER, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE.

7 OUBLITY

CMIC will replace products returned because of reproduction defects or incompleteness. The quality of the input document is not the responsibility of CMIC. Best available copy will be supplied.

CHANGES

No waiver, alteration, or modification of any of the provisions hereof shall be binding unless in writing and signed by an officer of CMIC.

9 DEFAULT AND WAIVER

- a If Customer fails with respect to this or any other agreement with CMIC to pay any invoice when due or to accept any shipment as ordered. CMIC may without prejudice to other remedies defer any further shipments until the default is corrected, or cancel this Purchase Order.
- b No course of conduct nor any delay of CMIC in exercising any right hereunder shall waive any rights of CMIC or modify this Agreement.

10 GOVERNING LAW

This Agreement shall be construed to be between merchants. Any question concerning its validity, construction, or performance shall be governed by the laws of the State of New York.

11 DEPOSIT ACCOUNTS

Customers who have a continuing need for ERIC documents may open a Deposit account by depositing a minimum of \$200,00. Once a deposit account is opened, ERIC documents will be sent upon request, and the account charged for the account cost and postage. A monthly statement of the account will be furnished.

12. STANDING ORDER ACCOUNTS

Customers who desire to receive microfiche copies of all ERIC reports announced in each issue of Resources in Education may do so by depositing \$2000.00 or submitting an executed purchase order. The cost of each issue and postage will be charged against the account. A monthly statement of the account will be furnished.

13 PAPER COPY (PC)

A paper copy PC* is xerographic reproduction, on paper, of the original document Each paper copy has a Vellum Bristol cover to identify and protect the document.

. 14. FOREIGN POSTAGE

Postage for all countries other than the United States is based on the international Postal Rates in effect at the time the order is shipped. To determine postage allow 75 microfiche or 75° PC pages per pound. Customers must specify the exact classification of mail desired, and include the postage for that classification with their order. Payment must be in United States funds.

ÖTHER ERIC COLLECTIONS AVAILABLE FROM EDRS

STANDING ORDERS

Subscription orders of microfiche copies of all ERIC reports announced in each issue of Resources in Education average \$160.00 per month.
